

Baptistry Drip Landing

Drip Landings are built into the floor at the top of the baptistry steps. It is a location for the candidate to remove their baptismal garment to reduce tracking water through the church.

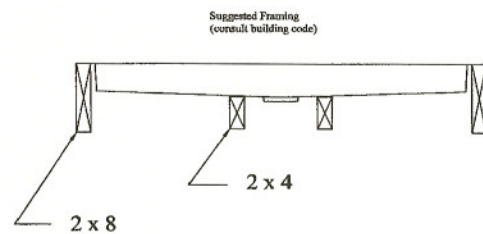

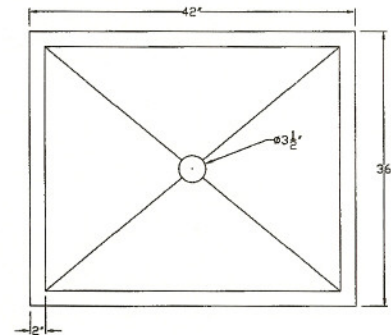

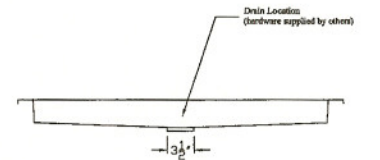

Each unit has a slip resistant surface. Water is channeled to a center drain position. (supplied by others)

Available in 4 colors:
Aqua—Blue—White—Cream

May be plumbed directly into baptistry drain

Old Fashioned Craftsmanship With Modern Composites Technology
